

A commutative diagram illustrating a relationship between four objects arranged in a square:

- Top-left object: γ_n
- Top-right object: γ'_n
- Bottom-left object: γ_{n+1}
- Bottom-right object: γ'_{n+1}

The objects are connected by four arrows:

- A horizontal arrow from γ_n to γ'_n labeled ϕ_n .
- A horizontal arrow from γ_{n+1} to γ'_{n+1} labeled ϕ_{n+1} .
- A vertical arrow from γ_n down to γ_{n+1} labeled f .
- A vertical arrow from γ'_n down to γ'_{n+1} labeled P_d .

The diagram is commutative, meaning the composition of maps along the top and bottom edges is equivalent to the composition along the left and right edges.
